

HOWDYHACK STARTER GUIDE

Howdy, welcome to *HowdyHack Diner!*

We're so glad you're here. Hackathons can be scary, so we here at TAMUhack created an **Aggies-only, beginner friendly** event to help new hackers get started. **On this page, you will find all the resources we provide within these 24 hours, specifically targeted to help those who need a little guidance!**

Pro-Tip: Don't hesitate to ask questions; our organizers are in pink sweatshirts & navy HowdyHack shirts! We don't bite 🐱

What is a Hackathon? A hackathon is a **sleepover/competition** where teams have 24 hours to create software/hardware projects. At the end, you may choose to present your project for a chance to win prizes. **But, it's more than coding.** Attend workshops and events from our schedule, have fun, and talk to organizers and hackers to make the most of your time here!

KEY SOFTWARE PROJECT WORKSHOPS (View Schedule on hh23.tamuhack.org)

Workshop Name	Description
Intro to Web Dev by TAMUhack Design & Tech	A general overview on building your first website application.
Intro to Github by TAMUhack Tech	Learn how to use Github and Git for team collaboration.
